BOARD MEMBERS HONORED FOR FOUR YEARS OF SERVICE

At the May Kansas State Board of Technical Professions Board Meeting, seven Board Members received plaques honoring them for the completion of four years of service. From left to right: F. Glenn Phinney, P.E., Donald Rathbone, P.E., Dr. Thomas Mulinazzi, P.E. L.S., Joe Johnson, Architect, Tex New, L.S., Richard Moberly, Geologist, and Board Chair Larry Hole, P.E. Phinney and Johnson are completing two terms of four years each, while Hole is finishing a partial term of two years plus one four year term. The other four have served their first term.

**Tex New, L.S.
1935-2004**

KSBTP, Land Surveyor Member

***NOTE:** The Board just received the sad news that board member Tex New, L.S. passed away on June 14, 2004. He is shown in the above photo receiving an award for his four years of service. He was very dedicated and committed to serving the Board of Technical Professions. The Board salutes his memory for kindness, intelligence, and dedication. All who knew him will sorely miss him.*

From The Board's Legislative Committee Important Legislative And Budget Update

Currently, the FY-2005 Budget for the Board of Technical Professions includes a transfer of approximately \$600,000 from the Board of Technical Professions Fee Fund to the State General Fund. This transfer could eventually result in cash flow difficulties for the Board, which could require resolution through some combination of (1) reduced operating expenditures and/or (2) increased licensure fees.

As you know, the Board of Technical Professions' budget is entirely financed by its licensure fund. The Board's legislative committee testified before the Senate and House Committees on this issue. We strongly opposed the taking of the \$600,000 on the basis of three

issues: (1) First, and foremost, the principle and the questionable legality of the process, (2) possible future cash flow problems with the Board's budgets, and (3) the need for a reserve fund if major litigation should occur.

Updates:

May 3, 2004: *THE CONFERENCE COMMITTEE REPORT WAS APPROVED BY THE LEGISLATURE, WHICH INCLUDES THE TRANSFER OF BTP FEE FUNDS INTO THE STATE GENERAL FUND ON JUNE 30, 2005. The amount officially certified on April 19, 2004 was \$549,744. HB 2949 was signed by the Governor on May 20, 2004.*

AGENCY MISSION

To provide maximum protection of the health, safety and welfare of the people of Kansas by assuring that the practice of engineering, architecture, land surveying, landscape architecture and geology in the state is carried out only by those persons who are proven to be qualified as prescribed by the statutes and rules and regulations of the Board of Technical Professions.

Programs Established To Assist With Agency Mission
Licensing, monitoring and regulating of technical professions:
• Examine and certify Intern Engineers
• License, monitor and discipline Engineers
• License, monitor and discipline Architects
• License, monitor and discipline Land Surveyors
• License, monitor and discipline Landscape Architects
• License, monitor and discipline Geologists
• Licensing of Professional and General Corporations

DISCIPLINARY ACTION TAKEN BY THE BOARD

IN THE MATTER OF HAROLD K. SCHOLZ COMPANY

Summary:

Several months ago, the Kansas State Board of Technical Professions received notice of a potential violation of the Kansas statutes and the Board’s rules regulating the practice of engineering in the State of Kansas. In that report, concerns were voiced regarding a Nebraska company that was alleged to be practicing engineering in the State of Kansas without benefit of licensure or a certificate of authorization. It was alleged that the Scholz Company had provided design and installation of electrical power and control equipment for several small cities in Kansas. Upon receipt of that report, the Complaint Committee of the Board had the matter investigated by one of its licensed professionals who had agreed to perform investigative services on an as-needed basis. Upon completion of the investigation, the investigator provided the Board with a report which indicated that, in his opinion, the company had engaged in the unlicensed practice of engineering. After receiving the investigative report, the Complaint Committee directed that a formal complaint be filed and the matter was set for hearing.

Mark Bennett

Board Action:

Prior to the formal hearing being held, the Board and Harold K. Scholz Company agreed to resolve the complaint by entering into a Settlement Agreement and Consent Order. In that agreement, Harold K. Scholz Company admitted that they had designed an electrical system to be furnished and installed for a line-up of fifteen KV switchgear along with control and metering equipment for an additional feeder. It also admitted that it had provided the design work for an electrical system or connection with the installation of a proposed 4029 KW or 4700 KW Generating Unit for the generating unit at the City of Sabetha, Kansas, power plant and had also provided design work for a 5 Kv and 15 Kv Switch Gear and a Step Up transformer for generating unit #7 and electrical design work for 4029 KW Generating Unit for the City of Sabetha, Kansas. Additionally, the company admitted that it had provided the design of an electrical system to be furnished and installed in connection with the proposed installation of either one 5,200 KW Generating Unit or two 3165 KW Generating Units for the City of Holton, Kansas.

The terms of settlement included the following:

1. The Harold K. Scholz Company, admitted that it had held itself out as entitled to practice, offered to practice or practiced in the State of Kansas the technical profession of engineering during the years 1998 and 1999 and further admitted that at all times relevant thereto it was not licensed or authorized to practice engineering in the State of Kansas.
2. The Harold K. Scholz Company agreed to pay a fine in the amount of \$2,500.00 and the Board’s expenses, including attorney fees incurred in prosecuting this matter in the amount of \$2,052.38 for a total fine and cost of \$4,552.38 to be paid forthwith.
3. The Harold K. Scholz Company shall forthwith cease and desist from practicing, offering to practice or holding itself out as authorized to practice the technical profession of engineering in the State of Kansas until such time as it has become licensed or obtained a certificate of authorization to do so.
4. The Harold K. Scholz Company shall forthwith cease and desist from using any letterhead, business cards, documents, advertisements, telephone listings or web sites in the State of Kansas which in anyway refer to it as being capable of providing engineering services until such time as it has become licensed or obtained a certificate of authorization to provide engineering services in the State of Kansas.

Status:

The Harold K. Scholz Company has now obtained a certificate of authorization to practice engineering in the State of Kansas and has paid the fine and expenses agreed to in the Settlement Agreement and Consent Order. The file has been closed.

IN THE MATTER OF ARMAND PETERSON

Summary:

In June of 2003, the Kansas State Board of Technical Professions received a report of an alleged violation of the Kansas statutes and the Board’s rules and regulations from a Kansas licensed engineer. The report indicated that a Missouri licensed engineer had prepared plans and specifications for a project that was to be constructed in the State of Kansas and had signed and sealed those plans and specifications with his Missouri engineering seal. Following an investigation of the matter by the Board’s Complaint Committee, it determined that a violation had occurred and that an attempt should be made to resolve the matter by way of a Settlement Agreement and Consent Order as opposed to a formal hearing. A Settlement Agreement and Consent Order was prepared and submitted to Mr. Peterson for his consideration, however, he declined to sign the same. Subsequently, a complaint was filed against Mr. Peterson and the matter was set for a formal hearing. On the date of the scheduled hearing, Mr. Peterson failed to appear.

Board Action:

- As a result of Mr. Peterson’s failure to appear, the hearing panel proceeded with the hearing and heard evidence. Thereafter, a Notice of Proposed Default Order was issued and sent to Mr. Peterson and his attorney. No response was received to the Notice of Proposed Default Order and the panel then issued its Final Order. Included in that Final Order, were the following conclusions of law:
1. By placing his seal on engineering plans for a facility located in the State of Kansas, Mr. Peterson was practicing the profession of engineering which required a license issued by the Kansas State Board of Technical Professions.
 2. It is unlawful to practice the profession of engineering in the State of Kansas without being licensed to do so by the Kansas State Board of Technical Professions, per K.S.A. 74-7001 and 74-7029.
 3. There was clear and convincing evidence that Mr. Peterson practiced the profession of engineering without a license, in violation of K.S.A. 74-7001 and 74-7029.
 4. Pursuant to the provisions of K.S.A. 74-7039, the Board may assess a civil fine of up to \$5,000, as well as

costs of the action including attorney fees.

The Hearing Panel then entered its order which provided:

1. Mr. Peterson is ordered to cease and desist from performing or offering to perform or holding himself out as licensed to practice the technical profession of engineering in the State of Kansas until such time as he becomes licensed to do so.
2. Mr. Peterson is ordered not to seal any engineering plans with his Missouri seal for building projects located in the State of Kansas.
3. Mr. Peterson was ordered to pay a fine in the amount of \$1,500, as well as the costs of this action, including attorney fees in the amount of \$1,672.03. The combined fine and costs total \$3,172.03 which Mr. Peterson was ordered to pay within 30 days from the date of the certificate of service, which was April 5, 2004.

Status:

As of May 1, 2004, Mr. Peterson had not paid the fine and costs of this matter.

IN THE MATTER OF DON PELLOW AND PELLOW ENGINEERING SERVICES, INC

Summary:

In September 2003, the Kansas State Board of Technical Professions received a report of an alleged violation regarding Don Pellow and Pellow Engineering Services, Inc. Neither Mr. Pellow nor Pellow Engineering Services, Inc. held a license or a certificate of authorization to practice engineering in the State of Kansas. At the time of the alleged violation, Mr. Pellow was licensed to practice engineering in the State of Missouri. The basis for the allegation that Mr. Pellow and/or Pellow Engineering Services were practicing engineering in the State of Kansas without being licensed to do so was Mr. Pellow’s use of a Leawood, Kansas, address for Pellow Engineering Services, Inc. and a Web site offering his services which also used a Leawood, Kansas, address.

Disciplinary Action/from page 3

Board Action:

The allegation that Mr. Pellow and Pellow Engineering Services, Inc. were practicing engineering in the State of Kansas without being licensed to do so was resolved by way of a Settlement Agreement and Consent Order.

The terms of settlement agreed upon by the parties provide as follows:

1. Don Pellow and Pellow Engineering Services, Inc., admit that they engaged in activity which could constitute holding themselves out as entitled to practice, offering to practice or practiced in the State of Kansas the technical profession of engineering during the year 2003 and further admits that at all times relevant thereto they were not licensed or authorized to practice engineering in the State of Kansas.

2. Don Pellow and Pellow Engineering Services, Inc. shall pay a civil fine in the amount of \$500 and the Board's expenses incurred in this matter in the amount of \$500 for a total of \$1,000 with said amount to be paid forthwith.

3. Don Pellow will immediately make application for a license to practice engineering in the State of Kansas and will vigorously pursue such application. Mr. Pellow further agrees to provide the Kansas State Board of Technical Professions periodic and timely evidence of pursuit of said license.

4. Don Pellow and Pellow Engineering Services, Inc. shall forthwith cease and desist from practicing, offering to practice or holding themselves out as authorized to practice the technical profession of engineering in the State of Kansas until such time as they have become licensed or authorized to do so and further shall forthwith cease and desist from using any letterhead, business cards, documents, advertisements, telephone listings or Web sites which in anyway refer to them as an engineer or being capable of providing engineering services in Kansas until such time as they have become licensed or authorized in the State of Kansas to do so. Provided, however, they shall not be required to change the name or dissolve the currently existing corporation as long as they are diligently pursuing an application for a Kansas license, or until they are rejected for such license.

Status:

On or about February 27, 2004, Don Pellow submitted his application for engineering licensure by comity. Mr. Pellow has been granted a Kansas engineering license and that license is presently in good standing. Pellow Engineering Services Inc. has now obtained a certificate of authorization to practice engineering in the State of Kansas. Mr. Pellow has paid the fine and expenses agreed to in the Settlement Agreement and Consent Order. The file has been closed.

IN THE MATTER OF JEFFREY KEITH HOWELL

Summary:

In March 2003, the Kansas State Board of Technical Professions received an inquiry from an attorney advising the Board that Jeffrey Keith Howell had sealed and signed a boundary survey for a tract of land and had indicated by writing across the seal that the survey was performed “without prejudice.” As a result of receiving that information, the Complaint Committee attempted to ascertain from Mr. Howell the purpose and significance of the term “without prejudice,” which he had placed on the aforementioned survey. Mr. Howell refused to provide the requested information and took the position that he did not have any obligation to provide the requested information. The Complaint Committee then directed that a complaint be filed against Mr. Howell asserting that he had violated the provisions of K.S.A. 74-7026(a)(2) and (4) and K.S.A. 74-7029(a)(8) and the provisions of K.A.R. 66-6-1(b) and K.A.R. 66-6-4(p)(2).

Board Action:

A hearing on the complaint was held before a panel of the Kansas State Board of Technical Professions. The panel found that Mr. Howell had not violated the statutes or rules and regulations of the Board when writing across his seal the term “without prejudice.” The order entered by the panel provided as follows:

“Finding no evidence to support the Complaint, we assess no fines or costs against Respondent. While we have concern regarding whether Respondent is attempting to limit his responsibility or liability for his work by writing “no prejudice” across the seal, such concern is legally insufficient to warrant disciplinary action in this instance.”

Report of Alleged Violation Procedure

An important part of being a professional is helping to uphold the high standards of the profession. *Webster's Dictionary* defines a profession as "a calling requiring specialized knowledge and often long and intensive academic preparation." Similarly, a professional is one who is "characterized as conforming to the technical or ethical standards of a profession." The regard with which a profession is considered is a direct result of the manner in which those professionals engaged in it conduct their practice. With the title of professional comes the often very difficult responsibility of ensuring that the high standards of the professionals are maintained.

The “Rules of Professional Conduct,” K.A.R. 66-6-4(p), states... Each licensee with knowledge of any

alleged violation of K.S.A. 74-7001 et seq. or the rules and regulations promulgated and adopted by the board shall: (1) report the alleged violation to the board; and (2) cooperate with the board furnishing information or any assistance that may be required.” To make this process easier, the following report of alleged violation form may be used. This use is not mandatory, however, and in many cases a written letter explaining the problem may provide even more information.

Inquiries may be sent to the Kansas State Board of Technical Professions, 900 SW Jackson, Room 507, Topeka, Kansas 66612-1257. It is important that the individual provide his or her name and address, as the Board cannot investigate anonymous inquiries.

KANSAS STATE BOARD OF TECHNICAL PROFESSIONS
REPORT OF ALLEGED VIOLATION FORM

1. Your Name, Address, & Phone Number:

2. Address of the building or project:

3. Name & address of person being reported:

4. Name of owner of project (if known):

5. Name of construction company involved in project (if known):

6. Please describe why you believe there may be a violation of our laws concerning this project:

[illegible]

7. Please provide any other information you believe is relevant to your complaint:

Date: _____ Signature: _____

John M. Hemphill

GREENSBURG - John M. Hemphill, 84, died April 3, 2004, at Rancho Mirage, Calif.

He was born Oct. 15, 1919, at Greensburg, the son of Mearl and Myrtle Burke Hemphill. He served as a First Lieutenant in the European Theater of World War II, in the U. S. Army’s 18th Field Artillery.

Prior to World War II, he worked for the Kansas Highway Commission on preliminary relocation survey parties. After the war, he completed his Bachelor of Science degree in Mechanical Engineering at Kansas State University, and he continued to work for the Highway Commission. He served as head of the regional office at Wichita. Later he became the Assistant Engineer of Tests at the Kansas Road Materials Laboratories in Manhattan and Topeka. After serving in that capacity, he became the State Engineer of Materials for the Kansas Department of Transportation at Topeka. He worked

14 years before retiring in 1984. In all, he completed 43 years of service for KDOT.

He was an active member of the American Society of Testing Materials and the American Society of State Highway and Transportation Officials, each for 14 years.

He married Alma Elaine Zentz at the Zentz family farm south of Greensburg on Feb. 4, 1943. She passed away in 2002. Survivors include: two sons, John M. Hemphill Jr., Ph.D., Rancho Mirage, Calif., and Randy J. Hemphill, DVM, Palm Springs, Calif.; a daughter, Mary Jane Hemphill, Sonora, Calif.; a brother, Russell Hemphill, Lindsay, Okla.; and a sister, Bernice Lyon, Greensburg.

Memorials may be sent to South Wind Hospice, Pratt, in care of Fleener Funeral Home, P.O. Box 763, Greensburg, KS 67054.

Reprinted from the Hutchinson News.

James Brosemer

James H. “Tony” Brosemer, 78, died April 26, 2004, from injuries sustained in an automobile accident on U.S.-50 near Cedar Point.

Born Jan. 20, 1926, in Burlington, he was the son of Anthony and Paulina (Wheeler) Brosemer.

He grew up in Florence and graduated from high school in 1943. After graduation, he briefly worked for the Kansas Highway Commission before going to the Army Air Corps during World War II. He was honorably discharged in 1946.

On May 23, 1947, he married Phyllis Williams in Newton. The couple had three children.

He was well-known and widely respected for his work as a land surveyor. He worked as a surveyor for the state of Kansas for more than 40 years, during which time he trained countless numbers of surveyors. After his retirement from the state, he had his own business and was in constant demand as a surveyor.

He was a hard worker and believed there was a proper way to do things. He passed on that conviction to all he

came in contact with, both in and out of the business.

He was passionate about his family and was devoted to his wife and children. He also enjoyed coin collecting, fishing, listening to Big Band tunes, following the Kansas City Royals, and everything to do with nature.

He was known for his clever sense of humor, incredible knowledge and love for family and friends.

He was preceded in death by his wife, Phyllis, who died nearly a year ago. He also was preceded in death by his parents and a sister, Winifred.

Survivors include a son, Steve of Emporia; two daughters, Julie Jantz of Florence and Merrilee Meisner of Hutchinson; a brother, John of Las Cruces, N.M.; a sister, Betty Mast of Carlsbad, N.M.; six grandchildren; and one great-grandchild.

Memorial funds were established for the James H. Brosemer Memorial Scholarship Fund of the Society of Kansas Land Surveyors or the Florence Historical Society.

Notice from the Office of the Kansas State Fire Marshall

DATE: 6-16-04
TO: FIRE OFFICIALS, BUILDING OFFICIALS AND ARCHITECTS
FROM: Joseph P. Odle, Kansas State Fire Marshal
RE: Notice of proposed adoption of new code footprint regulation, K.A.R. 22-1-7

NOTIFICATION – PLEASE POST

- Public building owners/operators of all new construction, additions and changes in use begun after July 9, 2004, shall provide and permanently maintain a code footprint at the site and make them available to fire authorities.
- Copies of code footprints shall be made available to local fire and building departments upon request.
- The state fire marshal’s office reviews facilities for the very young, very old, the sick, those incarcerated, large assemblies and large multi-family residential facilities because these are vulnerable occupancies.

Code Footprint is:

- a document which shows a structure owner’s compliance with state law to protect occupants from the dangers of fire and explosion;
- an architect’s or engineer’s written and graphic description of the intended life safety features in a public building.

STATE LAW ESTABLISHES:
MINIMUM LIFE SAFETY AND HAS UNIFORM FORCE AND EFFECT THROUGHOUT KANSAS. K.S.A. 31-133 and K.S.A. 2003 Supp. 31-134 require that all occupied structures conform to the basic life safety requirements:

- Existing occupied buildings cannot have hazardous conditions which slow speedy exits.
- Alterations of existing buildings cannot make existing conditions worse or block exits.
- New construction and changes in use are subject to greater life safety requirements.

The code footprint regulation K.A.R. 22-1-7:

- defines minimum features of a code footprint
 - for an objective evaluation by uniform application of state law using minimum resources; and
 - and makes available assistance to local fire and building officials for new construction and changes in use.
- provides a building owner
 - life safety choices to best suit their circumstances at the outset;
 - a simple record of the designer’s life safety features;
 - a fixed code target for the life of their building;
- simplifies review and efforts by the state fire marshal’s office because it
 - shows compliance with state law by verifying the following:
 - architect or engineer’s seal, signature and date
 - location of building and owner information as a single source contact for compliance with state law
 - code(s) of record for a specific building
 - occupancy type(s) which determine exits requirements (maximum occupant loads); fire alarm requirements; and automatic fire sprinklers requirements
 - reduces enforcement intervention after new construction
 - assist state fire marshal field inspectors to
 - verify completion of life safety features promised in paper
 - keep building owners on the same life safety document throughout the life of the building
 - see an overview of the entire life safety of a building at the outset of an inspection.

After its adoption in July 2004, K.A.R. 22-1-7 will be posted at the Web site www.accesskansas.org/firemarshal.

May 2004 Board of Technical Professions

Front row from left: Board member F. Glenn Phinney, P.E., Board Attorney Mark Bennett, Jr., Executive Director Betty Rose, Board members, Thomas Mulinazzi, P.E., L.S., Tex New, L.S. Second row: Board Members Philip Meyer, L.A., Joe Vanderweide, Architect, Joseph Johnson, Architect, Donald Rathbone, P.E., Stan Peterson, Architect, Murray Rhodes, L.S., Larry Hole, P.E., Richard Moberly, Geologist. Absent: Cecil Kingsley, P.E., Kenneth Vaughn, P.E.

Elevation Certificate

By Board Members Tex New, LS,
Tom Mulinazzi, PE, LS and Murray Rhodes, LS

A question regarding the elevation certificate and the determination of the base flood elevation was recently submitted to the board for clarification. The authors have discussed this issue with numerous engineers in private practice across the state and have researched the Rules and Regulations issued by KSBTP as well as applying common sense to the question. If the base flood elevation is established either by FEMA or by a governing body authorized to make such a determination or can be determined by interpolation, then a Land Surveyor may complete and sign an Elevation Certificate. If the base flood elevation is not readily apparent or any form of calculation must be performed to make the determination including the Quick2 program, then this must be left to those possessing the necessary knowledge, education, experience and license to make such a calculation, which means that only a Professional Engineer with the proper credentials and experience may sign the elevation certificate.

Architects — Joint Meeting of Region 3 and 5 of NCARB

By Stan Peterson, Architect Member

Joe Johnson, Stan Peterson and Betty Rose represented the Kansas State Board of Technical Profession at the 2004 Region 3 and Region 5 Joint Annual NCARB Regional Meeting March 25, 26 and 27, in Deadwood, South Dakota. Region 5, our Region, includes the states of Wyoming, Montana, North Dakota, South Dakota, Nebraska, Oklahoma and Kansas. Region 3 is represented by North Carolina, South Carolina, Georgia, Tennessee, Alabama, Mississippi, Arkansas, Texas, Louisiana, Florida, Virgin Islands and Puerto Rico.

The Region 5 Meetings reviewed the impending NCARB Annual Meeting resolutions, discussed “what’s happening in your state,” heard reports from the Region Chair, Region Treasurer and Region Director. Elections were held selecting Mark Aspaas of South Dakota as Chair (responsible for the Region), Harold Hite of Oklahoma as Vice Chair (watches over Chair), Tom Wood of Montana as Secretary/treasurer (responsible for the records kept by the Region Executive) and Stan Peterson as Region Director (represents the Region on the NCARB Board of Directors).

Joint meetings included presentations on Impediments to Reciprocity and the Broadly Experienced Architect Program. Jeff Huberman of North Carolina chaired the presentation on impediments and helped all jurisdictions understand what theirs are and how they might be dealt with. Stan Peterson chaired a discussion and presentation on the Broadly Experienced Architect program that allows a licensed architect who does not hold a NCARB Certificate or a NAAB accredited degree to acquire the NCARB Certificate and ultimately reciprocity with jurisdictions. There were several joint social events held to allow interaction and discussion between regions and jurisdictions.

A side trip was offered to Mount Rushmore and was enjoyed by two bus loads of architects, executives and family members.

This was a very successful meeting with participation exceeding expectations. The members of the Kansas contingency wish to thank the South Dakota Board for their hospitality and Betty Rose, Region 5 Executive Director, for organizing this meeting.

Change in Board Application Fees for Exams

Effective immediately, the Board is no longer charging an examination administration fee to candidates. Over the last year there has been a change in how the Board has handled the administration of examinations. All examinations except the geology are now being administered by the national organizations that are responsible for the development of the examinations. All the fees for the examinations are therefore paid directly to the administering organization.

The Board is responsible for licensing and, therefore, the Board reviews and approves all applications for examination. Since the exam candidates are paying an exam application fee directly to the exam vendors, the Board is no longer charging the candidate.

Changes Coming in Exam Score Reporting

The Kansas State Board of Technical Professions will be making a change in the way exam scores are reported beginning with exams given in October 2004. All exam scores will be reported as pass or fail only. No numeric scores will be reported for any exam given after Oct. 1, 2004. This change will affect engineering, land surveying and geology exam candidates. Architect and landscape architect exam scores are already reported as pass/fail only.

Exam Results and Newly Licensed Professionals

Architect Registration Examination - (Feb. 3, 2004 - May 5, 2004) The following individuals have successfully passed all parts of the architect exam and are now licensed.

<u>NAME</u>	<u>Home City</u>	<u>State</u>

Land Surveyors — Revision of K.S.A. 2003 Supp. 21-3721 Relating to Trespass

On May 13, 2004, Governor Kathleen Sebelius signed into law a revision to K.S.A. 2003 21-3721. The revision allows a licensed land surveyor and his/her agents and employees to enter land, waters, and other premises in making a survey without being guilty of criminal trespass, if a reasonable attempt to notify the landowner has been made. Upon notice, the landowner will have the right to modify the time and other provisions of the surveyor’s access, as long as the modifications do not unreasonably restrict completion of the survey. The change in does not remove civil or criminal liability for intentional acts of injury or for damages to the surveyor or authorized agents.

Use of Social Security
Number for Possible
Online Renewals

The Board is in the exploratory stages of developing an online process for license renewal. Please be advised that giving the Board your social security number is an **option**, not a requirement. Also, the social security number is not an open record as described *K.S.A. 45-221*. The board clearly understands the potential harm from fraudulent use of someone's social security number.

CONTINUING EDUCATION OFFERINGS

Civil PE Exam Review Course & PDH Course for Practicing Professional Engineers
Sept. 9 - Oct. 14, 2004, 6:30-9:30 p.m., Overland Park, KS
Spon: The University of Kansas School of Engineering & Continuing Education, 1515 St. Andrews Dr., Lawrence, KS 66047-1625. Contact: Mary Heberling, 785-864-3969, email: mheberling@ku.edu, www.kuce.org/app/civeng/perc. Aud: Engineers taking PE exam & Practicing Professional Engineers. KU will offer a live eleven-session PE Review Course for Civil Engineers. Classes will start Sept. 9, 2004, with two per week until Oct. 14. Sessions will be Mondays and Thursdays from 6:30-9:30 p.m. in Overland Park, KS. Fee: \$599. Deadline: Sept. 1, 2004. Contact Hours: 33.

AIA Kansas Conference and Exhibition
Oct. 1-2, 2004, 9 a.m.-5 p.m., Kansas City, MO
Spon: AIA Kansas, 700 SW Jackson, Suite 503, Topeka, KS 66603. Contact: Carol Maxim, 800-444-9853. Key Faculty: Rand Elliott, FAIA Elliot and Associates Architects, Oklahoma City, OK. Target: architects, engineers, landscape architects, other design professionals. Two days of workshops, seminars, tours, lectures, and trade show. See aiaks.org for more information. Fee: \$300. Deadline: Sept. 28.

Civil, Electrical & Manufacturing short courses & conferences.
Spon: The University of Kansas School of Engineering & Continuing Education, 1515 St. Andrews Dr., Lawrence, KS 66047-1625. Contact: Mary Heberling, 785-864-3969, email: mheberling@ku.edu, www.kuce.org. Aud: Engineers interested in civil, electrical & manufacturing logistical topics. Short courses offered in How to Lay Out a Warehouse & other logistic topics; Civil Engineering PE Exam Review course; conferences on Asphalt Paving; Structural Engineering; Environmental Engineering and Transportation Safety; In-house training developed for clients as requested. Fee: varies. Deadline: varies. Contact hours: 6-33.

Engineering Distance Master's Degrees
Spon: Kansas State University, Division of Continuing Education, 245 College Court Building, Manhattan, KS 66506. Contact: Ellen Stauffer, 785-532-2562, degrees@dce.ksu.edu. Aud: Individuals with bachelor's degrees in engineering, computer science, or related field. K-State's College of Engineering and Division of Continuing Education offers master's degrees via distance education in electrical, chemical, civil, mechanical

and software engineering and engineering management. Courses may also be taken to satisfy professional licensing continuing education requirements. Visit our Web site at <http://www.dce.ksu.edu/dce/engg>. Fee: varies. Deadline: varies. Contact hours: varies.

Engineering Professional Development Online Seminars
Spon: Kansas State University, Division of Continuing Education, 245 College Court Building, Manhattan, KS 66506. Contact: Ellen Stauffer, 785-532-2562, degrees@dce.ksu.edu. Target: Engineers and other professionals needing contact hours to satisfy professional licensing requirements. A distance education professional development seminar series providing PDHs or CEUs on a variety of topics including the Environment, Water Resources, Ethics, Problem Solving and Design, Hazardous Waste and others. Visit our Web site at www.dce.ksu.edu/dce/engg/noncredit/. Fee: varies. Deadline: NA. Contact hours: varies.

Approved Online Continuing Education for Engineers & Surveyors.
7 days/week, 24 hours/day, <http://www.PDHcenter.com>
Spon: PDH Center, 2410 Dakota Lakes Drive, Herndon, VA 20171-2995. Contact: Dr. John Huang, PE, 703-478-6833, info@PDHcenter.com. Key faculty: Dr. John Huang. Aud: Professional Engineers, Land Surveyors and Architects. PDHcenter.com offers a convenient, efficient and affordable way to earn PDH units online for your license renewal. Our Web site features more than 300 online courses, free content download, unlimited quiz access and instant certification of completion. Now you can save 20% on all PDH courses by entering coupon code "PDH5431" when ordering. Offer expires 4/30/05. For complete course listing, visit <http://www.PDHcenter.com>. Fee: Varies. Deadline: None. Contact hours: Varies.

ENGL 362 Technical Writing - Home study
Spon: University of KS Continuing Education, 1515 St. Andrews Dr., Lawrence, KS 66047. Contact: Jean Redeker, jredeker@ku.edu, 877-404-KUCE (toll free) 785-864-9193. Key faculty: Dr. Michele Eodice. This three hour online college level course, which can be taken on a non-credit basis, examines the general principles common to all technical writing and practical exercises in writing abstracts, reviews, letters, proposals, short reports, and long reports. Fee: \$489.65. Deadline: None; continuous enrollment. Contact hours: 130 credit/45 non-credit.
